DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-47 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 20- 47 respectively of copending Application No. 10/128,257.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the Claims of the current application are a broader version of the claims '257 because the claims in the current application claims two types of protocols but does not specifically mention IPv4 and IPv6. However it would have been obvious to one of ordinary skill

in the art that the breadth of these claims cover protocols that include IPv4 and IPv6. It has been held that the omission of an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184(CCPA). Also note *Ex parte Rainu*, 168 USPQ 375(Bd. App. 1969); omission of a reference element whose function is not needed would be an obvious variation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
